

## **[Important Notice]** Beware of Misinformation Regarding Our Hair Regeneration Technology

We have recently confirmed that a hair transplant clinic in Turkey is disseminating misleading information suggesting that it offers treatments using OrganTech's proprietary hair regeneration technology. Specifically, the clinic claims on its website to provide such treatments under the name "Tsuji Hair Regeneration."

However, we would like to make it absolutely clear that OrganTech, Inc. has never provided its hair regeneration technology to any medical institution in Turkey. Furthermore, the name "Tsuji Hair Regeneration" is in no way affiliated with OrganTech, Inc. or with our founder and chairman, Dr. Tsuji. The information published on the aforementioned clinic's website is entirely false and misleading.

We take these matters very seriously, and we may consider taking legal action against the dissemination of false information or any actions that harm our reputation.

Please note that our clinical research on hair regeneration is currently being prepared for implementation in Japan. For accurate and up-to-date information, we kindly ask you to refer to our official website and our official X (formerly Twitter) account.
